

EZTopUp Support Knowledge Base

For Crisp Hugo training (upload as File) and support agents. Website: <https://eztopup.io> | Support email: cs@eztopup.io | Last updated: July 2026

IMPORTANT: Once a customer has received a voucher CODE, the transaction is COMPLETE. Codes are issued live from suppliers and generally cannot be reversed. If our system error blocked fulfillment, offer review/resolution per policy.

1. Company overview

EZTopUp is a digital voucher and e-voucher marketplace at eztopup.io. Customers buy gaming and digital products with crypto stablecoins (USDT / USDC), then receive a voucher code via email / secure link, or get a direct top-up to a game account.

- Brand: EZTopUp
- Domain: <https://eztopup.io>
- Support: cs@eztopup.io
- Contact page: <https://eztopup.io/contact>
- Terms: <https://eztopup.io/terms>
- Privacy: <https://eztopup.io/privacy>

2. What we sell

Digital vouchers (redeemable codes) and selected direct digital top-ups. Catalog may change; always check the live product page for price and fields required.

Product types

- VOUCHER: customer needs email + quantity. Delivery is a voucher code / secure delivery link.
- DIGITAL top-up (example: Mobile Legends diamonds): customer needs User ID + Zone/Server ID. Value is credited to the game account; this is NOT a redeemable voucher code.

Example catalog (test / current focus)

- Mobile Legends - digital top-up (requires User ID + Zone ID)
- Steam Wallet - voucher code
- Roblox Gift Card - voucher code

Other brands (Google Play, PlayStation, Riot, etc.) may be unpublished during testing. If a product is not on the site, say it is currently unavailable.

3. How to buy (customer flow)

- 1) Open product page and choose a package / variant.
- 2) Set quantity (self-service has a max; bulk needs sales contact).
- 3) For ML top-up: enter correct User ID and Zone/Server ID.
- 4) Sign in / register (must accept Terms of Service on the login page).
- 5) Enter recipient email (where the voucher link/receipt is sent).
- 6) Pay with crypto checkout (USDT / USDC stablecoins when enabled).
- 7) Wait for payment confirmation, then fulfillment runs.
- 8) Check email, purchase history, and/or the secure voucher page for the code.

4. Payments

- Crypto-first checkout. Primary positioning: USDT and USDC stablecoins.
- Payment must be confirmed by the payment provider before fulfillment.

- Pending payment: order stays pending until confirmed or it expires within the payment window.
- Blockchain network delays are outside EZTopUp control; ask customer to wait for confirmations and share order number if stuck.
- Do not ask customers for private keys or seed phrases. Never.

5. Delivery & completion policy

After the customer RECEIVES the voucher code(s), the sale is final and complete. Our system obtains codes directly from suppliers at fulfillment time.

- Customer should store codes safely. Loss after delivery due to sharing, screenshots leaked, or wrong redeem is not refundable.
- Wrong game User ID / Zone entered by customer may credit the wrong account and may not be reversible.
- If payment is confirmed but no code / top-up arrived: collect order number, email used, approx payment time, and escalate for system review.
- Possible resolutions for verified OUR system errors: re-fulfill, replacement where possible, or refund/credit per operations policy. No guarantee of exchange-rate recovery on crypto.

6. Account & login

- Customers sign in via the site login (Clerk). Terms checkbox is required before sign-in UI unlocks.
- Purchase history is available when signed in (account / purchases).
- Login issues: try another browser, clear cookies, or use the same method as registration (e.g. Google).

7. Support channels & tone

- Primary human email: cs@eztopup.io
- On-site chat: Crisp (24/7 support presence; human may join when requested/available).
- Contact page: <https://eztopup.io/contact>
- Tone: professional, concise, helpful. English OK; Indonesian OK if customer writes in ID.
- Do not invent order statuses, voucher codes, or refund guarantees.
- Do not disclose supplier names, internal costs, or admin URLs.
- Never claim 'instant in seconds' if payment is still pending.

8. Escalation checklist (hand off to human)

Collect before escalating:

- Order number
- Account / recipient email
- Product name and package
- Payment time and currency (USDT/USDC) if known
- Screenshot of payment or error (if any)
- For ML: User ID + Zone they entered (do not ask for passwords)

9. Things the bot must NOT do

- Do not output fake voucher codes.
- Do not promise refunds after successful code delivery.
- Do not ask for crypto seed phrases, private keys, or full card data.
- Do not claim multi-coin support beyond USDT/USDC unless the live checkout shows more.
- Do not discuss competitors or internal supplier brand names.

10. Quick policy summary for Hugo

EZTopUp sells digital vouchers and top-ups at eztopup.io. Pay with USDT/USDC. Login required to purchase. Voucher codes are emailed / shown after payment confirms. Once a voucher code is received, the order is complete. For system failures after paid, support reviews case-by-case. Contact: cs@eztopup.io. Terms: </terms>. Privacy: </privacy>.
